

LED Program Card

USER MANUAL

Specification

1. Size: 70.0mm*45.0mm*13.0mm (L*W*H)
2. Weight: 23.0g

How to use the led program card

1. How to connect

Connect the ESC with the battery, power on the ESC, then plug the ESC signal wire into the right socket of the LED, wait for two seconds until LED is on, you are ready to program.

2. How to program

Press MENU button to select the main menu, press VALUE button to select the sub-menu, press OK button to confirm, press RESET button to reset.

For example: if you want to set Neutral Range at 8%, press MENU button to select 03, and press VALUE button to select 02, then press OK button.

If you want to reset the ESC value, press the RESET button first, then press OK button. Check the picture on the right for detail LED programmable value.
